	SEM1	SEM2	NS PRL	NS E2	NS T
Sex hormones	Low expression of most hormone-related genes; moderate <i>LHB</i>	Low expression of most hormone-related genes; FSHB-positive	High expression of PRL, moderate expression of CGA, GNRH2 and estrogen- synthesis genes	High expression of CGA and GNRH2 and estrogen- synthesis genes	High expression of testosterone-synthesis genes
Clinics	Middle-late age onset Predominantly seminoma Predominantly S0 - S1 marker stage	Late age onset Predominantly seminoma S0 - S3 marker stage	Early age onser NSGCT S0 - S2 marker stage	Early age onser NSGCT S1 - S3 marker stage	Early age onset Predominantly NSGCT Predominantly S0 - S1 marker stages
Biology	PD1 and IFN signaling MAPK signaling	Vitamin B1 metabolism IFN signaling Peptide hormone synthesis	Endothelial cell processes VEGF, WNT and NOTCH signaling	Cholesterol uptake and turnover Steroid synthesis Estrogen biosynthesis	Endothellial cell pathways Glucocorticoid and pregnolone synthesis FLT3 signaling Inflammasome
Metabolism	Purine metabolism	Vitamin B1 metabolism Purine metabolism	Steroid metabolism D-Ala metabolism	Steroid metabolism Folate metabolism Glutathione metabolism CoA metabolism Nucleotide matabolism	Steroid metabolism Nucleotide salvage Pyruvate metabolism Pentose phosphate cycle Vitamin B6 metabolism
TME	Mast cells Treg CD8+, CD8+ central memory, CD8+ effector memory B cells Immunogenic Low stroma	Mast cells Treg CD8+, CD8+ central memory, CD8+ effector memory B cells Immunogenic Low stroma	Endothelial cells Cancer-associated fibroblasts Non-Immunogenic High stroma stroma	Endothelial cells Cancer-associated fibroblasts Non-Immunogenic High stroma stroma	Endothelial cells Cancer-associated fibroblasts Non-Immunogenic High stroma stroma
Signaling	NK/T cell -mediated cytotoxicity Chemokine signaling Innflammatory pathways	NK/T cell -mediated cytotoxicity Chemokine signaling Innflammatory pathways	Focal adhesion ECM receptor interaction Oncogenic signaling	Focal adhesion ECM receptor interaction Oncogenic signaling Adipokine and neuroactive signaling	Focal adhesion ECM receptor interaction Oncogenic signaling
RFS	Excellent	• Good	Moderate	• Poor	Excellent
